

A Collaborative Masterpiece: Jeremy Pierce's 1965 Chevy C-10 Pick-Up Truck, Crafted by JRW Rods and Customs

Nestled in the picturesque town of Washington, Utah, a remarkable 1965 Chevy C-10 pick-up truck reigns supreme, embodying the perfect fusion of power, style, and craftsmanship. Owned by Jeremy Pierce, this stunning vehicle stands as a testament to the collaborative effort between Jeremy and Wayne Glasgow, a skilled Project Manager and the owner of JRW Rods and Customs. The journey began when Jeremy stumbled upon the truck, originally a long bed, in Idaho and decided to turn his vision into a reality—an awe-inspiring, bad-ass custom truck that delivers exceptional performance, power, and reliability. In this article, we will delve into the captivating story behind the creation of this extraordinary truck, showcasing Wayne's expertise, the collaborative build process, and the exceptional beauty that has been brought to life in this beast of a truck, built to fulfill Jeremy's desire for a truly remarkable driving experience.

Jeremy Pierce's quest to create a one-of-a-kind Chevy C-10 led him to seek the expertise of Wayne Glasgow, a renowned master of automotive design and customization at JRW Rods and Customs. Jeremy shared his ambitious vision of a powerful and stylish truck that would not only turn heads but also surpass all expectations. Wayne, with his deep understanding of the craft, eagerly embarked on the journey to transform Jeremy's dream into a tangible reality. Throughout the project, Forgeline Wheels, LS3, wheel served as a major inspiration, influencing the design cues that can be seen in the custom grille, the air filter cover, interior vents, and more. Every detail was meticulously planned and executed to not only unify the truck's overall aesthetics but also showcase what can be achieved when resolute dedication is combined with the art of building a one-of-a-kind '65 C-10.

Wayne Glasgow, serving as the Project Manager and owner of JRW Rods and Customs, brought a wealth of experience, knowledge, and artistic flair to the table. With a commitment to excellence that knows no bounds, Wayne's team meticulously planned and executed every aspect of the build, leaving no detail unattended. From the smallest details to the grand design elements, every facet of the truck received the utmost attention. Wayne's mastery extended beyond mere aesthetics; he meticulously selected high-quality components, employed precision engineering techniques, and showcased impeccable craftsmanship that set this Chevy C-10 apart from any that have come before. However, as with any ambitious project, the build of Jeremy Pierce's Chevy C-10 encountered its fair share of challenges. Sourcing rare parts and overcoming technical hurdles became tests of determination and innovation for the dedicated team at JRW Rods and Customs. Undeterred, they approached each obstacle as an opportunity for growth and problem-solving, ensuring that no compromises were made on the final outcome.

The collaboration between Jeremy Pierce and Wayne Glasgow was a harmonious partnership built on trust, shared passion, and a mutual dedication to perfection. Regular meetings, discussions, and creative exchanges fueled the progress of the project, with Wayne guiding Jeremy through the decision-making process and offering his expert advice. This synergy

between the owner's vision and the builder's expertise resulted in a truly exceptional truck that surpassed all expectations. When it came to meeting the horsepower requirements, the team identified the LT4 Connect and Cruise engine from GM Performance as the perfect choice, backed by a T56 6-speed manual transmission. This combination ensured that the truck would deliver not only raw power but also an exhilarating driving experience, ideal for canyon carving, spirited driving, and the occasional big smokey burnout.

Understanding the importance of a solid foundation, Wayne turned to the expertise of Speedtech Performance to ensure a remarkable driving experience. The ExtReme C-10 chassis with Torque Arm Rear Suspension was selected, featuring the renowned Extreme front suspension and a Ford-style 9" rear end. The technical specifications of the ExtReme C-10 chassis provides the person behind the wheel with a direct connection to the road, instilling confidence and transforming the C-10 into a modern corvette-like driving experience.

With a solid foundation established and a 640 horsepower engine in place, the project surged forward, focusing on creating a '65 Chevy C-10 unlike any other. Wayne Glasgow and his skilled team meticulously crafted every aspect of the truck to perfection. The body underwent stunning modifications, including a custom grille insert, hand-built roll pans, and seamlessly integrated flush mount windshield and rear glass. Applying a custom PPG teal and charcoal paint, Wayne's team showcased the truck's unique contours and commanding presence. Attention to detail extended to the interior, with modifications to the stock dash, a custom billet insert, Dakota Digital gauges, and luxurious leather upholstery, seamlessly blending classic truck charm with modern comfort. The engine bay, designed to be visually clean and clutter-free, revealed Wayne's clever innovation—a functional space between the door and the hood, accessed using electric motors that open compartments on each side. The left side holds the brake fluid reservoirs, while the right side houses the coolant tank for the supercharger fluid. Adding to the meticulous details, a motorcycle-inspired pop-up fuel filler cap was discreetly placed at the back of the tailgate.

Wayne Glasgow's expertise extended beyond aesthetics to ensure that the Chevy C-10 delivered exhilarating performance. With meticulous care, he selected and installed a potent powertrain, the best suspension, and created a total package to provide a thrilling driving experience. Every element of the truck works harmoniously, unleashing its true power and potential.

Jeremy Pierce's 1965 Chevy C-10 pick-up truck stands as a testament to the collaborative genius of Wayne Glasgow and the craftsmanship of JRW Rods and Customs. Through Wayne's guidance and expertise, Jeremy's vision was transformed into an extraordinary reality. This exceptional vehicle showcases not only their shared passion for automotive artistry but also the boundless possibilities that emerge when skilled builders and devoted owners come together. From its powerful performance to its breathtaking aesthetics, this custom Chevy C-10 stands as a true masterpiece, capturing the attention and admiration of all who encounter it. Every detail, meticulously planned and executed, contributes to the overall harmony and exceptional quality of the truck. It serves as a testament to the dedication, skill, and relentless pursuit of excellence.

by the team at JRW Rods and Customs. Jeremy Pierce's 1965 Chevy C-10 pick-up truck is more than a vehicle—it is an embodiment of the vision, craftsmanship, and collaborative spirit that can turn dreams into reality.
